PROFESSIONAL SUMMARY

IT undergraduate specializing in Spring Boot backend development, with hands-on experience designing secure, scalable REST APIs using Java, Spring Boot, Spring Security, and Hibernate/JPA on MySQL. Comfortable across the full stack with Angular, and experienced deploying production-grade Spring Boot applications on AWS using Docker and Nginx. Has applied Spring Boot backends to AI-integrated systems using the Gemini API. Strong analytical and problem-solving skills, seeking a Spring Boot Developer role to build robust backend systems.

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, Spring Security (JWT), Hibernate/JPA, RESTful APIs

Frontend Development: Angular, TypeScript, JavaScript, HTML5, CSS3

Databases & Cloud: MySQL, AWS (EC2), Docker, Docker Compose, Nginx

Tools & Languages: Git, Postman, Maven, Python, C++, C, C#

SOFTWARE ENGINEERING PROJECTS

Car Rental Management System — Spring Boot Backend & Full-Stack

- Designed and developed a secure Spring Boot backend for a car rental platform with full user authentication and role-based authorization (Admin/User).
- Built core REST API modules for vehicle tracking, customer registration, and booking management on a relational MySQL database using Hibernate/JPA.
- Secured REST API endpoints with Spring Security (JWT) to enforce strict, role-based access control policies.

Technologies: Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, REST API

AI-Powered Resume Job Matcher — Spring Boot Backend & Cloud Deployment

- Architected a Spring Boot REST API backend that analyzes resumes against job descriptions, generating intelligent match scores and actionable feedback.
- Integrated the Google Gemini AI API into the Spring Boot backend for semantic analysis and natural language understanding of resume content.
- Containerized the Spring Boot backend and Angular frontend with Docker and deployed to an AWS EC2 instance behind an Nginx reverse proxy for production access.

Technologies: Java, Spring Boot, Angular, MySQL, Docker, AWS, Gemini AI

AI Customer Support Chatbot — AI / Backend

- Developed an automated chatbot delivering instant, context-aware responses to user queries, improving customer support efficiency.
- Applied NLP concepts to enhance interaction quality and response accuracy across a conversational interface.

Technologies: Python, Java, JavaScript, HTML/CSS, AI/NLP

Book Management System — Frontend / Backend

- Built a responsive web application to digitally manage book records with full CRUD functionality.
- Developed reusable Angular components integrated with backend REST APIs for seamless, real-time data synchronization.

Technologies: Angular, TypeScript, Spring Boot, HTML/CSS

EDUCATION

Bachelor of Information and Communication Technology (BICT) Honours — University of Vavuniya, Sri Lanka 08/2023 – Present

G.C.E. Advanced Level — WP/GM Henegama National School, Gampaha

2019 – 2022

Engineering Technology – B | Science for Technology – B | ICT – C

G.C.E. Ordinary Level — WP/GM Dangalla Darmaraja Maha Vidyalaya, Kirindiwela

2016 – 2018

3 A's, 4 B's, 1 C, 1 S (including Mathematics & Science)

LANGUAGES

Sinhala: Native / Bilingual Proficiency

English: Professional Working Proficiency

Tamil: Conversational / Basic Proficiency

CERTIFICATIONS & COURSES

- Spring Boot Mastery — Spring Boot Academy
- Spoken English — Britishway English Academy
